Simple yet full of character

The Fyr Stool is named after the Danish word for pine, emphasizing the material's unique character and durability. The combination of square and round elements creates a perfectly balanced design that exudes strength and elegance. Striving to create a stool that is both practical, simple and intriguing, designer Yuchen Wu explored numerous sketches before arriving at the final design. Of the design process, Yuchen says: "When designing something as simple as a stool, the challenge is to make it uncomplicated and practical, but still interesting. The result is a well-balanced combination of sturdiness, simplicity and detail, that at the same time allows the pine material to take center stage."
